

Our prices are based on the hours it actually takes to perform an aircraft inspection on the listed aircraft. No matter who does your annual aircraft inspection these are the average hours that it takes to perform a complete inspection on the listed aircraft. If you're getting quotes with significant less hours for an inspection be aware that you will not be receiving a full inspection and your annual may very well be pencil whipped. A "cheap" annual will cost you a lot of money down the road.
